DETAILED ACTION

Applicant's election without traverse of Group I (claims 1-10) in Paper No. 4 is acknowledged. Claims 11-20 are withdrawn from further consideration by the Examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 2874

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of copending Application No. 10/052,281 (referred to as '281). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present invention are broader than '281, but claims essentially the same subject matter. For example, claim 1 of the present invention does not include the clamp or the shape of the opening as being elliptical as in claim 1 of '281. Additionally, claim 1 of the present invention recites "a gasket defining at least one opening for admitting an entrance of the at least one input fiber and the at least one output fiber"; whereas, claim 1 of '281 recites "between at least one input fiber and at least one output fiber... holding the fibers, the at least one fiber clamp being inserted into the at least one elliptical opening." Claim 10 of '281 also recites "a gasket defining at least one elliptic opening for admitting an entrance of fibers". Allowance of claims 1-10 of the present invention would thus improperly ^{timewise} extend the "right to exclude" granted by the patenting of claims 1-19 in '281.

JDD

Art Unit: 2874

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cohen U.S. Patent No. 6,502,999, as the closest prior art, discloses an optical transceiver module for hermetically sealing the optical device.
